

# Motivation letter for computer certificate of Payam Noor

- I want to continue this field to change my career path
- My goal in life is to be useful to others, especially to my country, Iran. This is my ultimate success. I am learning to be useful, to learn the skills that my country needs
- Learning computer science makes me useful for my country. Programming gives me the skills to help my country financially. To bring currency into the country, to increase the skills of my compatriots.
- I think the field of computer is the most complete field for me and my goal. I first tried to operate in the international financial markets so that I could import currency. But due to sanctions, I could not continue my activities. But now I want to make tools in this market and be able to be the best person in this field, even in the world
- Payame Noor University is my first choice for my goal. Because I can study remotely, work more in my field of interest, and work freely.
- I can work with a passion for learning, active participation and intense focus. I have an unlimited desire to learn. The desire to learn skills that are useful to others. It moves me and motivates me. I always participate in related discussions and I certainly share my opinions with others. I would love to work in the field of artificial intelligence and market forecasting. Because in the future, it is artificial intelligence that determines the power of a country.
- Finally, I hope to be able to design site, design indicators and experts, design artificial intelligence algorithms to predict and learn
